MULTIFUNCTIONAL DIGITAL SYSTEMS

Troubleshooting Guide

e-STUDIO 206L / 256 / 306 / 356 / 456

e-STUDIO 256SE / 306SE / 356SE / 456SE
Thank you for purchasing TOSHIBA Multifunctional Digital Systems. This manual describes how to troubleshoot the problems that could occur while you are using the equipment. Keep this manual within easy reach, and use it to configure an environment that makes the best use of the e-STUDIO's functions.

This equipment provides the scanning/printing function as an option. However, this optional scanning/printing function is already installed in some models.

How to read this manual

Symbols in this manual

In this manual, some important items are described with the symbols shown below. Be sure to read these items before using this equipment.

⚠️ WARNING
Indicates a potentially hazardous situation which, if not avoided, could result in death, serious injury, or serious damage, or fire in the equipment or surrounding objects.

⚠️ CAUTION
Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury, partial damage to the equipment or surrounding objects, or loss of data.

Note
Indicates information to which you should pay attention when operating the equipment.

Other than the above, this manual also describes information that may be useful for the operation of this equipment with the following signage:

Tip
Describes handy information that is useful to know when operating the equipment.

Pages describing items related to what you are currently doing. See these pages as required.

Screens

• Screens on this manual may differ from the actual ones depending on how the equipment is used, such as the status of the installed options.
• The illustration screens used in this manual are for paper in the A/B format. If you use paper in the LT format, the display or the order of buttons in the illustrations may differ from that of your equipment.

Trademarks

• The official name of Windows XP is Microsoft Windows XP Operating System.
• The official name of Windows Vista is Microsoft Windows Vista Operating System.
• The official name of Windows 7 is Microsoft Windows 7 Operating System.
• The official name of Windows Server 2003 is Microsoft Windows Server 2003 Operating System.
• The official name of Windows Server 2008 is Microsoft Windows Server 2008 Operating System.
• Microsoft, Windows, Windows NT, and the brand names and product names of other Microsoft products are trademarks of Microsoft Corporation in the US and other countries.
• Apple, AppleTalk, Macintosh, Mac, Mac OS, Safari and TrueType are trademarks of Apple Inc. in the US and other countries.
• Adobe, Acrobat, Reader, and PostScript are trademarks of Adobe Systems Incorporated.
• Mozilla, Firefox and the Firefox logo are trademarks or registered trademarks of Mozilla Foundation in the U.S. and other countries.
• IBM, AT and AIX are trademarks of International Business Machines Corporation.
• NOVELL, NetWare, and NDS are trademarks of Novell, Inc.
• TopAccess is a trademark of Toshiba Tec Corporation.
• Other company names and product names in this manual are the trademarks of their respective companies.

Chapter 4  TROUBLESHOOTING FOR SCANNING

Scanning Problems ..................................................................... 92
  Cannot E-mail my scans ......................................................................................... 92
  Cannot find the data saved in the shared folder ........................................................................ 92

Chapter 5  TROUBLESHOOTING FOR e-Filing

e-Filing Web Utility Problems ..................................................... 94
  e-Filing Web Utility terminates the session ..................................................................... 94
  Numerous sub windows repeatedly appear ..................................................................... 94
  Displaying the items in the Contents Frame takes a long time ........................................ 94
  Error messages .......................................................................................................... 95

Chapter 6  TROUBLESHOOTING FOR NETWORK CONNECTIONS

Locating the Equipment in the Network ...................................... 98
  Cannot locate the equipment in the network ................................................................ 98
  Cannot locate the equipment with Local Discovery ................................................... 99
  Equipment does not respond to ping command .......................................................... 100

LDAP Search and Authentication Problems .................................... 101
  Network shutdown occurs or touch panel disabled after LDAP search ........................ 101
  LDAP authentication takes a long time ........................................................................... 101

Printing Problems (Network Related) .......................................... 102
  SMB print in a Windows operating system environment .......................................... 102
  Raw TCP or LPR print in a Windows operating system environment ................................ 102
  IPP print in a Windows operating system environment .............................................. 103
  Novell print in a NetWare environment ..................................................................... 103
  Macintosh environment ............................................................................................. 104
  UNIX/Linux environment ......................................................................................... 104
Network Fax (N/W-Fax) Driver Problems................................................................. 105
  N/W-Fax Driver Installation Error Messages.......................................................... 105
  N/W-Fax Driver General Errors .............................................................................. 106
Client Software Authentication Problems................................................................. 108
  Cannot log in using client software......................................................................... 108

Chapter 7  CHECKING THE EQUIPMENT STATUS WITH TopAccess

Hardware Status Icons on TopAccess [Device] Tab.................................................. 110
Error Messages ........................................................................................................... 112
Error Codes.................................................................................................................. 114
  Error codes on print jobs ......................................................................................... 114
  Error codes on transmission and reception.............................................................. 115
  Error codes on scan jobs......................................................................................... 117

Chapter 8  WHEN SOMETHING IS WRONG WITH THE EQUIPMENT

When You Think Something Is Wrong With the Equipment........................................ 124
  General operations .................................................................................................. 124
  Originals and paper ................................................................................................. 125
Regular Maintenance ................................................................................................. 126

INDEX ............................................................................................................................ 127
TROUBLESHOOTING FOR THE HARDWARE

This chapter describes how to troubleshoot problems with paper, toner and other finishing processes. This chapter also describes how to supply the paper, toner and staples.

**Error Codes**

The error codes indicating the status of the equipment may appear on the touch panel. You can find the listings of these error codes in Chapter 7.  
[Page 114 “Error Codes”](#)
Clearing a Paper Jam

 Locating a paper jam

The equipment stops copying when the original or copy paper is jammed. Paper jams are notified on the touch panel as follows:

1. Reversing Automatic Document Feeder (optional) (lower) (P.16)
2. Reversing Automatic Document Feeder (optional) (upper) (P.17)
3. Fuser unit (P.24)
4. Automatic duplexing unit (P.21)
5. Bypass tray (P.21)
6. Drawer feeding portion (P.18)
7. Large Capacity Feeder (P.19) or Paper Feed Pedestal (both optional) (P.19)
8. Paper transport path (P.22)
9. Drawers (P.20) or drawer of the Large Capacity Feeder (optional) (P.20)
10. Job Separator, Offset Tray or Bridge Kit (all optional) (P.26, P.27)
11. Hole Punch Unit (optional) (P.27, P.31, P.39, P.42)
12. Saddle stitch unit (optional) (P.35, P.44)

The picture of the hardware device shown on the touch panel differs depending on the finisher options installed.
# Clearing a paper jam

1. **Clear the paper jam**
   
   Clear the paper jam following the guidance shown on the touch panel. Press ▲ or ▼ to scroll the pages.

![Clearing a paper jam image]

2. **After clearing the jam, close all the opened covers.**
   
   The equipment starts the warm-up. Follow the guidance on the touch panel.

## Tips on removing the jammed paper

Note the following points in removing the jammed paper.

- **Remove the jammed paper carefully so as not to tear it.**
  
  To avoid tearing the jammed paper, remove the paper slowly with both hands. Using force may tear the paper, making it more difficult to remove. See also that no pieces of torn paper are left inside the equipment.

- **When the paper jam sign remains after removing the jammed paper;**
  
  Depending on the timing of the occurrence, no jammed paper may be found where the paper jam sign indicates. If the sign does not disappear after you have removed the jammed paper, follow the steps as instructed on the touch panel.

- **Do not touch the fuser unit or the metal portion around it.**

  ![CAUTION image]

  Do not touch the fuser unit or the metal portion around it when you remove the paper jammed in the right side of the equipment. This could burn you or the shock could cause you to get your hand injured in the machine.

- **Do not touch the photoconductive drum.**

  ![Photoconductive drum image]

  When you remove the paper jammed in the right side of the equipment, be sure not to touch the photoconductive drum. This could stain copy images.
If paper jams occur frequently

The following are the common causes of paper jams. If the problem persists, check for the following situations.

- An unsuitable original is placed on the Reversing Automatic Document Feeder.
- Unavailable paper with the equipment is used.
- Paper sizes are not consistent between the size in a drawer or the bypass tray and the size registered in the equipment.
- All the jammed paper has not been removed.
- There is too much of a gap between the paper and the side or end guide in the drawer.
- The amount of paper placed in a drawer exceeds the limit indicated on the side guide of the drawer.

Paper jam in the Reversing Automatic Document Feeder (optional) (Lower)

1. Open the Reversing Automatic Document Feeder.

2. Lower the green lever, open the reverse cover and remove the original.

1. Paper jam in the Reversing Automatic Document Feeder (optional) (Upper)

1. Raise the lever and open the upper cover.

2. Remove the original.

3. Turn the inner green dial and remove the jammed original.

4. Raise the green lever and open the transport guide.

5. Raise the guide plate under the transport guide, and remove the original under the guide plate.
6 Close the transport guide.

7 Raise the original feeder tray, and remove the original under the tray.

8 Lower the original feeder tray.

9 Close the upper cover.

**Paper jam in the drawer feeding portion**

1 Open the feeder cover on the right side.

2 Remove the jammed paper from the drawer and close the feeder cover.
If the paper is jammed on the cover side, remove it as shown in the figure on the right.

**Paper jam in the Large Capacity Feeder (optional)**

1. Open the feeder cover of the Large Capacity Feeder on the right.

2. Remove the jammed paper and close the feeder cover.

**Paper jam in the Paper Feed Pedestal (optional)**

1. Open the feeder cover of the Paper Feed Pedestal on the right.
2 Remove the jammed paper and close the feeder cover.

Paper jam in the drawers

1 Open the paper source drawer, and remove the jammed paper.

2 Check that the guide width is correct, there is no folded/curled paper or overloading, and then close the drawer.

   Note
   Be sure that the height of the stacked paper does not exceed the line indicated inside of the side guides.

Paper jam in the drawer of the Large Capacity Feeder (optional)

1 Open the drawer of the Large Capacity Feeder, and remove the jammed paper.
2 Check that there is no folded/curled paper or overloading, and then close the drawer of the Large Capacity Feeder.

Note
Be sure that the height of the stacked paper does not exceed the line indicated inside of the side guides.

■ Paper jam in the bypass tray

1 Move the green paper holding lever toward the outside.
The paper can now be removed.

2 Pull out the jammed paper in the bypass tray.

3 Place paper in the bypass tray again and then move the green paper holding lever toward the inside.
If a sheet of paper is stained, folded or torn, replace it with a new one.

■ Paper jam in the automatic duplexing unit

⚠️ CAUTION
Be careful not to let your fingers be caught between the equipment and the duplexing unit or automatic duplexing unit.
This could injure you.
1 Open the automatic duplexing unit on the right.

2 Remove paper jammed on the paper transport path above the fuser unit. (Only for e-STUDIO356/456)

3 While holding the green lever to lift up the transfer unit, remove the jammed paper.

4 Lower the transfer unit carefully and then close the automatic duplexing unit.

**Paper jam on the paper transport path**

⚠️ **CAUTION**

Be careful not to let your fingers be caught between the equipment and the duplexing unit or automatic duplexing unit.

This could injure you.
2 Open the transport guide toward you and remove the jammed paper.

**Note**

Be sure not to touch the photoconductive drum when removing the jammed paper. This could stain copy images.

3 Close the automatic duplexing unit.
Paper jam in the fuser unit

⚠️ CAUTION
- Be careful not to let your fingers be caught between the equipment and the duplexing unit or automatic duplexing unit. This could injure you.
- Do not touch the fuser unit or the metal portion around it. Since they are very hot, you could be burned or the shock could cause you to get your hand injured in the machine.

1. Open the automatic duplexing unit on the right.

2. Press down the two green fuser pressure release levers until they stop.

   Tip
   The fuser pressure release levers will automatically return to their original position when the automatic duplexing unit is closed.

3. Open the transport guide holding the green knob and then release the jammed paper. Pull the jammed paper up or down as shown in the illustrations depending on the position of the paper.

   Pulling it up

   Pulling it down
4 Remove the paper from the exit section.

5 When the finisher (optional) is installed, open the Bridge Kit cover while holding the handle.

6 Remove the jammed paper.

7 When the finisher is installed, close the Bridge Kit cover.

8 Close the transport guide holding the green knob.

9 Close the automatic duplexing unit.
Paper jam in the Job Separator and the Offset Tray (both optional)

The procedure below is only for e-STUDIO206L/256/306 with the Job Separator or the Offset Tray installed and not valid for e-STUDIO356/456 with the Job Separator installed.

**CAUTION**

- Be careful not to let your fingers be caught between the equipment and the duplexing unit or automatic duplexing unit. This could injure you.
- **Do not touch the fuser unit or the metal portion around it.** Since they are very hot, you could be burned or the shock could cause you to get your hand injured in the machine.

1. Open the automatic duplexing unit on the right.

2. Open the cover inside of the equipment.

3. Remove the jammed paper.

4. Close the cover inside of the equipment.

5. Close the automatic duplexing unit.
Paper jam in the Bridge Kit (optional)

1. Open the cover holding the handle of the Bridge Kit.

2. Remove the jammed paper inside the Bridge Unit.
   - **Tip:**
   If the jammed paper cannot be removed because the right side is caught by the fuser unit, follow the steps on P.24 “Paper jam in the fuser unit”.

3. Close the Bridge Kit cover.

Paper jam in the Finisher MJ-1101 and the Hole Punch Unit MJ-6103 (both optional)

Paper Jam in the upper receiving tray

1. Raise the lever and open the upper receiving tray of the finisher.

2. Remove the jammed paper.
3 **Open the cover holding the handle of the Bridge Unit.**
When the Hole Punch Unit MJ-6103 is installed, proceed to step 5.

4 **Remove the jammed paper.**
   Proceed to step 8.

5 **Open the Hole Punch Unit cover.**

6 **Turn the green knob to get the jammed paper out.**

7 **Close the Hole Punch Unit cover.**
8 Close the Bridge Kit cover.

9 Close the upper receiving tray of the finisher.
Place your hands on the near and far side of the lever and push to close the tray until it clicks.

⚠️ CAUTION ⏰
Be careful not to let your fingers be caught between the finisher body and the upper tray of the finisher. This could injure you.

**Tip**
The upper receiving tray can also be closed by pressing the right side of the lever.

---

Jam in the lower receiving tray.

1 Raise the lever and open the upper receiving tray of the finisher.

2 Remove the jammed paper.

3 Lower the shutter of the paper exit portion and remove the paper.
4 Open the cover holding the handle of the Bridge Unit.  
When the Hole Punch Unit MJ-6103 is installed, proceed to step 6.

5 Remove the jammed paper.  
Proceed to step 9.

6 Open the Hole Punch Unit cover.

7 Turn the green knob to get the jammed paper out.

8 Close the Hole Punch Unit cover.
9 Close the Bridge Kit cover.

10 Close the upper receiving tray of the finisher.
Place your hands on the near and far side of the lever and push to close the tray until it clicks.

⚠️ CAUTION
Be careful not to let your fingers be caught between the finisher body and the upper tray of the finisher. This could injure you.

Tip
The upper receiving tray of the finisher can also be closed by pressing the right side of the lever.

■ Paper jam in the Saddle Stitch Finisher MJ-1106 and the Hole Punch Unit MJ-6103 (both optional)

1 Raise the lever and open the upper receiving tray of the finisher.

2 Open the cover of the Hole Punch Unit when it is installed.
3 Open the front cover of the finisher.

4 Remove the jammed paper from the right or left.

5 Open the cover holding the handle of the Bridge Unit.

6 Remove the jammed paper inside the Bridge Unit.
7 If the paper size is small, turn the knob shown in the following figures to send the paper, and then remove the jammed paper.

**Note**

When the Hole Punch Unit is installed, open the front cover of the finisher and turn the 2 knobs at the same time.

When the Hole Punch Unit is not installed

When the Hole Punch Unit is installed

---

8 Lower the shutter of the paper exit portion and remove the paper.

---

9 Close the cover of the Bridge Unit.

10 Close the upper receiving tray of the finisher.

Place your hands on the near and far side of the lever and push to close the tray until it clicks.

**CAUTION**

Be careful not to let your fingers be caught between the finisher body and the upper tray of the finisher. This could injure you.

---

**Tip**

The upper receiving tray of the finisher can also be closed by pressing the right side of the lever.
11 Close the cover of the Hole Punch Unit when it is installed.

12 Close the front cover of the finisher.
Paper jam in the Saddle Stitch unit of the Saddle Stitch Finisher MJ-1106 (optional)

1. Remove the jammed paper from the exit side of the Saddle Stitch unit.

2. Open the front cover of the finisher.

3. Holding the green knob, move the guide to the right.

4. Raise the lever and open the upper receiving tray of the finisher.

5. Open the cover of the Hole Punch Unit when it is installed.
6 Turn the knob shown in the following figures to send the paper, and then remove the jammed paper.

**Note**

When the Hole Punch Unit is installed, open the front cover of the finisher and turn the 2 knobs at the same time.

When the Hole Punch Unit is not installed

![Diagram showing knob turning for uninstalled Hole Punch Unit]

When the Hole Punch Unit is installed

![Diagram showing knob turning for installed Hole Punch Unit]

Some jammed paper may get inside of the Saddle Stitch unit depending on the location where the jamming occurs. In this case, follow step 7.

7 Close the upper receiving tray of the finisher.

Place your hands on the near and far side of the lever and push to close the tray until it clicks.

**CAUTION**

Be careful not to let your fingers be caught between the finisher body and the upper tray of the finisher. This could injure you.

**Tip**

The upper receiving tray of the finisher can also be closed by pressing the right side of the lever.

8 Turn the green knob to lower the paper until it is hidden.
9 Holding the green knob, return the guide to the left.

10 Pull out the Saddle Stitch unit until it stops.

11 Open the transport guide on the right side.

12 Remove the jammed paper.

13 Remove the paper from the inside of the Saddle Stitch unit.
14 Close the transport guide.

15 Holding both green knobs with your fingers, open the transport guide on the left.

16 Lower the two green levers.

17 Remove the paper.

18 Raise the two green levers.
19 Holding both green knobs with your fingers, close the transport guide on the left.

20 Return the Saddle Stitch unit to its original position.

21 Close the cover of the Hole Punch Unit when it is installed.

22 Close the front cover of the finisher.

Paper jam in the Inner Finisher MJ-1032 and the Hole Punch Unit MJ-6007 (both optional)

1 Lift up the control panel and then open the front cover of the finisher.
2 While holding the green lever, move the finisher to the left until it stops.

3 Pull down the green lever on the right-hand unit of the finisher.
   The paper exit of the equipment opens.

4 Turn the green dial clockwise to send the paper and remove it.

5 Return the green lever to its original position.

6 When the Hole Punch Unit is installed and used for punching holes, while pulling the green dial toward you, turn it to align the yellow marks on the parts.
7 Turn the upper green dial counterclockwise to remove the jammed paper.

8 Turn the upper green dial clockwise to remove the jammed paper.

9 Holding the green knob, open the upper cover.

10 Remove the jammed paper and then close the upper cover.

11 While holding the green lever, open the Hole Punch Unit to remove the jammed paper.
12 Return the Hole Punch Unit to its original position.

13 Carefully return the finisher to its original position.

⚠️ CAUTION
Do not put your hand or fingers on the top of the finisher when closing it. They could be caught and this could injure you.

14 Close the front cover of the finisher.

Paper jam in the Saddle Stitch Finisher MJ-1033 and the Hole Punch Unit MJ-6008 (both optional)

1 Remove the jammed paper from the receiving tray section.

2 Open the front cover of the finisher.
3 Turn the green dial until the triangle mark falls within the designated area of the label.

4 Move the upper green lever to the right and remove the jammed paper.

5 Return the lever to its original position.

6 Open the upper cover of the finisher and remove the jammed paper.

7 Close the upper cover of the finisher.
8 Close the front cover of the finisher.

**Paper jam in the Saddle Stitch unit of the Saddle Stitch Finisher MJ-1033 (optional)**

1 Remove the paper jammed on the saddle stitch tray in the lower left part of the finisher.

2 Open the front cover of the finisher.

3 Move the lower green lever to the right and remove the jammed paper.

4 Return the lever to its original position.
Clearing a Paper Jam

1 TROUBLESHOOTING FOR THE HARDWARE

5 Close the front cover of the finisher.

### Clearing paper jams caused by a wrong paper size setting

Paper jams occur when there is a mismatch between the size of the paper in a drawer or the bypass tray and the size registered for the corresponding drawer or the bypass tray in the equipment. The message “Check paper size setting on control panel for drawer N. Check the direction or size of the paper.” or “Check paper size setting on control panel for Bypass. Check the direction or size of the paper.” appears on the touch panel.

In this case, just clearing the jammed paper does not prevent another paper jam. Be sure to follow the procedure below. Troubleshooting differs depending on how the paper jam has occurred:

- P.45 “Jam when making copies or prints (using a drawer)”
- P.47 “Jam when making copies or prints (using the bypass tray)”
- P.48 “Jam when printing from the FAX”

#### Jam when making copies or prints (using a drawer)

1. Clear the paper jam following the guidance shown on the touch panel.

2. Open the paper source drawer, check that the guide width is correct and there is no folded/curler paper or overloading, and then close the drawer.

   **Note**
   
   Be sure that the height of the stacked paper does not exceed the line indicated inside of the side guides.

3. Close all the drawers or covers.
   The print job is canceled.

   ![Image of the attention screen with yes and no options]

   If you do not want to cancel the print job
   To restart the job without canceling it, replace the paper in the drawer with that corresponding to the size set in the
   equipment after the paper jam is cleared. Then if you press [NO] in step 4, the job can be restarted. In this case, it
   is not necessary to follow step 5 and later.

5 Press the [USER FUNCTIONS] button on the control panel.

   ![Image of the control panel with user functions button]

6 Press the [USER] tab to enter the [USER] menu and press [DRAWER].

   ![Image of the user functions menu with drawer option]
7 Press the drawer button indicated in the message.

8 Press the paper size button corresponding to the paper placed in the drawer, and [OK].

9 Press the [USER FUNCTIONS] button to return to the basic menu and try copying or printing again.

Jam when making copies or prints (using the bypass tray)

1 Clear the paper jam following the guidance shown on the touch panel. Then close all the covers.
The print job is canceled.

If you do not want to cancel the print job
To restart the job without canceling it, replace the paper on the bypass tray with that corresponding to the size set in the equipment after the paper jam is cleared. Then if you press [NO] in step 2, the job can be restarted. In this case, it is not necessary to follow step 3 and later.

3 Place the paper on the bypass tray and set the paper size.

4 Try copying or printing again.

Jam when printing from the FAX

1 Pull out the drawer in which paper jams occurred and remove all the paper from it.

2 Place the paper corresponding to the set size in the drawer.
3 Check that the guide width is correct and there is no folded/curled paper or overloading, and then close the drawer.

Note
Be sure that the height of the stacked paper does not exceed the line indicated inside of the side guides.

4 Clear the paper jam following the guidance shown on the touch panel. Then close all the drawers and covers.
Printing resumes.
Clearing a Staple Jam

When a staple jam has occurred in the stapler of the finisher or saddle stitch unit, clear the jam following the procedure below.

P.50 “Staple jam in the finisher”
P.56 “Staple jam in the Saddle Stitch unit”

Staple jam in the finisher

Finisher MJ-1101 / MJ-1106

1 Open the front cover of the finisher.
   An illustration of MJ-1101 is given in the right-hand figure.

2 Remove the staple cartridge.

3 Lower the guide while holding the knob.
   CAUTION
   Do not touch the stapling area.
   The actual needle point could cause you personal injury.

4 Remove the top staple sheet.
1. Lift up the control panel and then open the front cover of the finisher.

2. Holding the knob, raise the guide, and return it to its original position.

3. Remove the staples fallen between the staple cartridge and the staple case or the ones in the staple receiver.

4. Fit the staple cartridge into the stapler.
   When fitting the staple cartridge, hold the green-labeled portion of the bracket securely so that the bracket will not move. Insert the cartridge until it is caught by the latch and fixed with a click.

5. Close the front cover of the finisher.

**Inner Finisher MJ-1032**

6. Lift up the control panel and then open the front cover of the finisher.
2 While holding the green lever, move the finisher to the left until it stops.

3 Open the Hole Punch Unit while pushing the green lever.

4 Remove the staple cartridge.

5 Lower the guide while holding the knob.

⚠️ CAUTION
Do not touch the stapling area.
The actual needle point could cause you personal injury.

6 Remove the top staple sheet.
7 Holding the knob, raise the guide, and return it to its original position.

8 Remove the staples fallen between the staple cartridge and the staple case or the ones in the staple receiver.

9 Fit the staple cartridge into the stapler.
   Insert the cartridge until it is caught by the latch and fixed with a click.

10 Return the Hole Punch Unit to its original position.

11 Carefully return the finisher to its original position.

⚠️ CAUTION
   Do not put your hand or fingers on the top of the finisher when closing it.
   They could be caught and this could injure you.
12 Close the front cover of the finisher.

Saddle Stitch Finisher MJ-1033

1 Open the front cover of the finisher.

2 Remove the staple cartridge.

3 Lower the guide while holding the knob.

⚠️ CAUTION
Do not touch the stapling area.
The actual needle point could cause you personal injury.

4 Remove the top staple sheet.
5 Holding the knob, raise the guide, and return it to its original position.

6 Remove the staples fallen between the staple cartridge and the staple case or the ones in the staple receiver.

7 Fit the staple cartridge on the stapler. Insert the cartridge until it is caught by the latch and fixed with a click.

8 Close the front cover of the finisher.
Staple jam in the Saddle Stitch unit

Saddle Stitch finisher MJ-1106

1 Open the front cover of the finisher, and pull out the Saddle Stitch unit until it stops.

2 Remove the staple cartridge.

3 Raise the guide while holding the knob.

⚠️ CAUTION
Do not touch the stapling area.
The actual needle point could cause you personal injury.

4 Remove the top staple sheet.

5 Holding the knob, lower the guide, and return it to its original position.
6 Fit the staple cartridge.
    Insert the cartridge until it is caught by the latch and secured with a click.

7 Return the Saddle Stitch unit to its original position.
    Close the front cover of the finisher.

---

Saddle Stitch Finisher MJ-1033

1 Open the left cover of the finisher.

2 Remove the staple cartridge.

3 Push the green lever up.
4 Lift the shutter knob while pulling the green lever downward.

5 Remove the stale sheet left.

⚠️ CAUTION
Do not touch the stapling area. The actual needle point could cause you personal injury.

6 Push the shutter knob down and return it to its original position.

7 Fit the staple cartridge.
Insert the cartridge until it is caught by the latch of the staple cartridge and is fixed with a click.

8 Close the left cover of the finisher.
Replacing a Toner Cartridge

When the toner cartridge runs out, the message “Install New toner cartridge” appears. Replace the toner cartridge following the procedure below when you see this message.

To assure optimal printing performance, we recommend that you use only genuine TOSHIBA toner cartridges.
Troubleshooting for the Hardware

Replacing a Toner Cartridge

Never attempt to incinerate toner cartridges.
Dispose of used toner cartridges in accordance with local regulations.

Recommended toner cartridges

To assure optimal printing performance, we recommend that you use only genuine TOSHIBA toner cartridges. If you use a TOSHIBA-recommended toner cartridge, you can utilize the following three functions of this equipment:

Cartridge detecting function:
This function checks if the toner cartridge is correctly installed and notifies you if it is not.

Toner remaining check function:
This function notifies you when there is little toner remaining in the cartridge, as well as notifying your authorized service representative automatically by remote service.

Image quality optimization function:
This function controls image quality according to the characteristics of the toner to be used and enables you to print images of an optimal quality.

If you are using a toner cartridge other than the one we recommend, the equipment may not be able to detect whether it is installed or not. Therefore, even if the toner cartridge is correctly installed, the error message “TONER NOT RECOGNIZED” appears on the touch panel and printing may not be performed. You may also not be able to utilize the image quality optimization function, the toner remaining check function, and the remote service function which notifies your service representative automatically.

If you are using a toner cartridge other than the one we recommend, toner is not recognized. If this is a problem for you, please contact your service representative. Remember you will not be able to utilize the Toner remaining check function and Image quality optimization function as we mentioned.

⚠️ WARNING

Never attempt to incinerate toner cartridges.
Dispose of used toner cartridges in accordance with local regulations.

**Note**

Do not touch the parts on the circuit board mounted on the toner cartridge because they may be damaged.

**Tip**

Some toner remains in the toner cartridge while the message “Toner near Empty” is displayed. You do not have to replace the toner cartridge yet, but if you choose to do so, follow the procedure P.63 “Replacing a “Near Empty” toner cartridge”.

1. Open the front cover of the equipment.
2 Hold down the green lever.  
The toner cartridge is slightly pushed out.

3 Pull out the toner cartridge.

⚠️ WARNING ⚠️

Never attempt to incinerate toner cartridges.  
Dispose of used toner cartridges in accordance with local regulations.

4 Shake the new toner cartridge strongly with the label surface down to loosen the toner inside.

5 Pull out the seal in the direction of the arrow.

6 Insert the toner cartridge along the rail.  
Insert the toner cartridge until it clicks.
7 Carefully pull the cleaner out until it comes to a stop, and then carefully reinsert it straight into its original position. Repeat this step a couple of times.

**Note**

Check that the cleaning knob is fully inserted after cleaning.

8 Close the front cover.
Reparing a “Near Empty” toner cartridge

The message “Toner near Empty” appears on the touch panel when there is not much toner left in a toner cartridge.

Some toner is still left in the toner cartridge while the message “Toner near Empty” is displayed. You do not have to replace the toner cartridge yet, but if you choose to do so, follow the procedure below.

1. Press [JOB STATUS].
2. Press the [TONER] tab.
3 Press [REPLACE TONER CARTRIDGE].

4 To replace a toner cartridge, press [YES]. To cancel, press [NO].

5 Replace the toner cartridge.
   See P.59 “Replacing a Toner Cartridge” for the correct procedure.

6 Press [FINISH].
Refilling With Staples

Refill with staples according to the following procedures when the staples in the stapler of the finisher and saddle stitch unit run out.

P.65 “Refilling finisher staples”
P.69 “Refilling Saddle Stitch unit staples”

Refilling finisher staples

Finisher MJ-1101 / MJ-1106

1 Open the front cover of the finisher.
   An illustration of MJ-1101 is given in the right-hand figure.

2 Remove the staple cartridge.

3 Take the empty staple case out of the staple cartridge.
   Pull up the empty staple case while pushing both sides as shown in the figure.

4 Fit a new staple case on the staple cartridge.
   Push the staple case hook into the staple cartridge socket until you hear a click.
5 Fit the staple cartridge into the stapler.
When fitting the staple cartridge, hold the green-labeled portion of the bracket securely so that the bracket will not move.
Insert the cartridge until it is caught by the latch and fixed with a click.

6 Close the front cover of the finisher.

Tip
If the message "Check staple cartridge" remains, repeat the procedure above from steps 1 to 6.

Outer Finisher MJ-1032

1 Lift up the control panel and then open the front cover of the finisher.

2 While holding the green lever, move the finisher to the left until it stops.

3 Open the Hole Punch Unit while pushing the green lever.
4 Remove the staple cartridge.

5 Take the empty staple case out of the staple cartridge.
   Pull up the empty staple case while pushing both sides as shown in the figure.

6 Fit a new staple case on the staple cartridge.
   Push the staple case hook into the staple cartridge socket until you hear a click.

7 Fit the staple cartridge into the stapler.
   Insert the cartridge until it is caught by the latch and fixed with a click.

8 Return the Hole Punch Unit to its original position.
9 Carefully return the finisher to its original position.

⚠️ CAUTION
Do not put your hand or fingers on the top of the finisher when closing it.
They could be caught and this could injure you.

10 Close the front cover of the finisher.

):( Saddle Stitch Finisher MJ-1033

1 Open the front cover of the finisher.

2 Remove the staple cartridge.

3 Take the empty staple case out of the staple cartridge.
Pull up the empty staple case while pushing both sides as shown in the figure.
4 Fit the new staple case into the staple cartridge. Push the staple case hook into the staple cartridge socket until you hear a click.

5 Fit the staple cartridge into the stapler. Insert the staple cartridge until it is caught by the latch and fixed with a click.

6 Close the front cover of the finisher.

Refilling Saddle Stitch unit staples

Saddle Stitch finisher MJ-1106

1 Open the front cover of the finisher, and pull out the Saddle Stitch unit until it stops.
2 Remove the staple cartridges.
Replace both cartridges at a time.

3 Press the buttons on both sides of the cartridge.
The transparent cover of the cartridge is lifted.

4 After the transparent cover is lifted, take the empty staple case out of the cartridge.

5 Fit the new staple case into the staple cartridge.
Insert it to the rear until it clicks.

**Note**
In this step, do not remove the seal bundling the staples.

6 Press down the transparent cover of the cartridge.
Press it down until it clicks.
7 Pull out straight the seal bundling the staples.

8 Fit the staple cartridge.
   Insert the cartridge until it is caught by the latch of the staple cartridge and is fixed with a click.

9 Return the Saddle Stitch unit to its original position. Close the front cover of the finisher.

Saddle Stitch Finisher MJ-1033

1 Open the left cover of the finisher.

2 Remove the staple cartridge.
3 Pull out straight the stopper holding the staples of the new staple cartridge.

4 Fit the staple cartridge.
   Insert the cartridge until it is caught by the latch of the staple cartridge and is fixed with a click.

5 Close the left cover of the finisher.
Cleaning the Charger

If the inside of the charger is dirty, staining may appear on the copied image. Clean the charger following the procedure below.

1. Open the front cover of the equipment.

2. Carefully pull the cleaner out until it comes to a stop, and then carefully reinsert it straight into its original position. Repeat this step a couple of times.

   **Note**
   Check that the cleaning knob is fully inserted after cleaning.

3. Close the front cover.
Cleaning the Hole Punch Dust Bin

When the hole punch dust bin becomes full, dispose of the paper punchings following the procedure below.

■ Hole Punch Unit MJ-6103

1. Open the Hole Punch Unit cover.

2. Pull out the hole punch dust bin.

3. Dispose of the paper punchings.

4. Push back in the hole punch dust bin.

5. Close the Hole Punch Unit cover.

■ Hole Punch Unit MJ-6007

1. Lift up the control panel and then open the front cover of the finisher.

2. While holding the green lever, move the finisher to the left until it stops.
3 Open the Hole Punch Unit while pushing the green lever.

4 After moving the hole punch dust bin to the left, pull it toward you.

5 Dispose of the paper punchings.

6 Push back in the hole punch dust bin.

7 Return the Hole Punch Unit to its original position.

8 Carefully return the finisher to its original position.

⚠️ CAUTION
Do not put your hand or fingers on the top of the finisher when closing it. They could be caught and this could injure you.

9 Close the front cover of the finisher.
Hole Punch Unit MJ-6008

1. Open the front cover of the finisher.

2. Pull out the hole punch dust bin.

3. Dispose of the paper punchings.

4. Push back in the hole punch dust bin.

5. Close the front cover of the finisher.
Removal and Installation of the Exit Support Tray

If a large number of sheets are printed at a time, some printed sheets may be pushed out of the exit tray. Remove the exit support tray on the exit tray of the equipment when printing more than 300 sheets. If the exit support tray is removed, the alignment of a large number of printed sheets can be improved and about 500 sheets of Toshiba recommended plain paper can be loaded on the exit tray.

**Notes**

- To maintain the alignment of the printed sheets, use the exit support tray unless a large number of sheets are printed.
- When an optional finisher or Job Separator is installed in the equipment, do not remove the exit support tray. (e-STUDIO206L/256/306, in which the Offset Tray or Job Separator is installed, has no exit support tray.)

Removing the exit support tray

1. Place your fingers in the 2 grooves on the exit support tray and lift it up by pressing the latches inward.

Installing the exit support tray

1. Hold the exit support tray so that the letter “F” on its back points towards you.

2. Install the exit support tray. Align the grooves on the exit tray with the protrusions on the back of the exit support tray and push it until it clicks in order to fix it.
TROUBLESHOOTING FOR COPYING

This chapter describes how to troubleshoot the problems on copying and copy output.

Copying Problems

80
### Copying Problems

See the table below when you have a problem in operating copy function or have an unexpected copy output.

<table>
<thead>
<tr>
<th>Problem Description</th>
<th>Cause</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Functions cannot be set.</td>
<td>Another function that is unavailable for the combination has already been set.</td>
<td>Some functions cannot be combined. For details, refer to Chapter 8 of the Copying Guide.</td>
</tr>
<tr>
<td>Copying stops while scanning the originals. (The message “The number of originals exceeds the limits Will you print out stored originals?” appears.)</td>
<td>The number of scanned pages has reached the maximum.</td>
<td>To copy the scanned images, press [YES]. To cancel, press [NO].</td>
</tr>
<tr>
<td>Copying stops while scanning the originals. (The message “Not enough Work Space to store originals Will you print out stored originals?” appears.)</td>
<td>No available internal memory remains.</td>
<td>To copy the scanned images, press [YES]. To cancel, press [NO].</td>
</tr>
<tr>
<td>Copied image is too light.</td>
<td>No toner is left.</td>
<td>The message “Install new toner cartridge” appears when no toner is left. Replace the toner cartridge. P.59 “Replacing a Toner Cartridge”</td>
</tr>
<tr>

- Print jobs not output ....................................................................................................................... 90
Print Job Problems

This section describes how to clear the print jobs errors.

Clearing print job errors

Problem Description
A print job error occurs and [JOB STATUS] blinks when the paper specified by the computer is not set in the drawers of the equipment.

Corrective Action
Clear the error following the procedure below.

To print by placing paper on the bypass tray

1. Press the [JOB STATUS] which is blinking.

2. Place paper of the size specified with the computer on the bypass tray, and press the [START] button.

Printing by selecting a paper size already placed in another drawer
You can perform printing with the paper already placed in the drawers. Some part of the image may not be printed, however, if the paper size in the drawer is smaller than the one you have specified.
Press the drawer button you intend to use on the touch panel and press the [START] button.
3. TROUBLESHOOTING FOR PRINTING

**Cannot remember the document password for a Private Print job**

**Problem Description**
I cannot remember the document password for my Private Print job.

**Corrective Action**
The document password for a Private Print job is never shown, once the job has been sent to the equipment. To print the failed Private Print job, submit the document again as a new Private Print job.

The failed Private Print job remains unprinted in the job queue. To delete it, either way below is required. Contact the administrator of the equipment.

- Enter the administrator’s password in the Private Print job list on the touch panel and delete the job.
  For details, refer to the *Printing Guide*.
- Log on to TopAccess with the administrator’s password and delete the job in the Print Job list.
  For details, refer to the *TopAccess Guide*.

**Printing a document including many graphics takes time**

**Problem Description**
It takes time to print a document including many graphics from a Universal Printer Driver (PCL6).

**Corrective Action**
Since this may happen occasionally, clear the [JPEG Compression] check box of the [PDL Settings] tab in [Customization] of the [Device Settings] tab before printing such documents.
Printer Driver Problems

This section describes the troubleshooting for the printer drivers.

Tip

For the error messages that appear during the installation of the printer drivers, refer to the Software Installation Guide.

**Cannot print (port setting problems)**

**Problem Description**

I cannot perform printing with the equipment.

**Corrective Action**

If the printer driver on the client computer points to a wrong network port, jobs neither appear in the current jobs queue nor are printed. Fix the problem following the procedure below:

1. Open the Printers folder from the Control Panel.
2. Right-click the printer driver icon.
3. Select Properties from the shortcut menu.
5. Make sure that the path to the printer and the device name are correct.
   \<device name>\print
   <device name> is the same as the device name set from the touch panel. “print” may be “univ” or “ps3” depending on the printer driver you use.
6. Click the [General] Tab and click [Print Test Page] to confirm that the settings are correct.

**Cannot print (SNMP Community Name problems)**

**Problem Description**

I cannot perform printing with the equipment.

**Corrective Action**

Check if the SNMP community names are the same in the following 3 settings.

- Equipment
- TCP/IP port of the [Ports] tab in the printer driver
- [SNMP Settings] dialog box of the [Others] tab in the printer driver

**Command line options not processed**

**Problem Description**

All the print options are sent to the equipment at the beginning of the print job. If the print file already contains print commands, they overwrite the command line options you set. For example, if the print file specifies Letter paper, and you specify A4 paper with the lp command, the document is printed on Letter size paper.

**Corrective Action**

Change the properties of the document you intend to print to create another print file. Submit the print job using the lp command without setting additional parameters.
3 TROUBLESHOOTING FOR PRINTING

■ Retrieval of printer configuration failed

Problem Description
When accessing the printer properties, the message “Retrieval of printer configuration failed” is displayed.

Corrective Action
The printer driver cannot communicate with the equipment. Try the steps in the checklist below.

<table>
<thead>
<tr>
<th>No</th>
<th>Check...</th>
<th>Yes</th>
<th>No</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Is the equipment turned on?</td>
<td>Next Step</td>
<td>✔</td>
<td>Turn on the equipment.</td>
</tr>
<tr>
<td>2</td>
<td>Can you connect the computer to the equipment via TopAccess?</td>
<td>Next Step</td>
<td>✔</td>
<td>Restart the equipment.</td>
</tr>
<tr>
<td>3</td>
<td>Does the same message appear again when you access the property of the printer driver?</td>
<td>✔</td>
<td>End</td>
<td>Check the printer driver port assignment and make sure that it is correct.</td>
</tr>
</tbody>
</table>

■ Cannot change settings on the [Device Settings] tab

Problem Description
The [Device Settings] tab is grayed out and their settings cannot be changed.

Corrective Action
Users who do not have the privilege to change the printer driver setting cannot change the options in the [Device Settings] tab. Please log on with the Administrator.
Network Connection Problems

This section describes the troubleshooting for printing in the network connection environment.

**Tip**
See also the checklists by types of printing and operating systems on P. 102 “Printing Problems (Network Related)”

### Cannot print with the equipment (network connection problems)

**Problem Description**
I cannot perform printing with the equipment.

**Corrective Action**
See the checklist below to determine if the cause of the problem is related to a network. If it is, see P. 102 “Printing Problems (Network Related)”. In that section, several OS- and printing method-based check lists are provided to help you find the appropriate action to take.

<table>
<thead>
<tr>
<th>No.</th>
<th>Check...</th>
<th>Yes</th>
<th>No</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Have you set the protocol settings so they are compatible with your network and client protocol settings?</td>
<td>Next Step Ø</td>
<td>Yes</td>
<td>Set up the proper protocol.</td>
</tr>
<tr>
<td>2</td>
<td>Have you set up the appropriate type(s) of print services that should be supported?</td>
<td>Next Step Ø</td>
<td>Yes</td>
<td>Check the settings required for your printing environment.</td>
</tr>
<tr>
<td>3</td>
<td>If you are using Novell print services, did you set up the Novell side of network printing, such as creating print servers and attaching the print queue?</td>
<td>Next Step Ø</td>
<td>Yes</td>
<td>Set up the NetWare server. Refer to the Software Installation Guide.</td>
</tr>
<tr>
<td>4</td>
<td>If you set up Novell print services, can you see the print job using PCONSOLE or NWAdmin?</td>
<td>Next Step Ø</td>
<td>Yes</td>
<td>Refer to your Novell PCONSOLE or NWAdmin user documentation for help with using these utilities.</td>
</tr>
<tr>
<td>5</td>
<td>Have you checked the gateway and subnet settings to make sure that the equipment is part of the same network gateway as the client from which you are trying to print?</td>
<td>Next Step Ø</td>
<td>Yes</td>
<td>Set up the TCP/IP correctly.</td>
</tr>
<tr>
<td>6</td>
<td>Are other services and communications performed over the network behaving in the normal and expected manner?</td>
<td>End</td>
<td>Yes</td>
<td>Refer to your network documentation or use a network diagnostic utility to identify the network problem.</td>
</tr>
</tbody>
</table>

### Cannot print with SMB print

**Problem Description**
When an attempt is made to print a document using an SMB connection, the job cannot be printed and such messages continuously appear as “No more connections can be made to this remote computer” or “Your file could not be printed due to an error”.

**Corrective Action**
SMB print is supposed to be utilized in a small network. If you can use Windows XP, Windows Vista, Windows 7, Windows Server 2003, or Windows Server 2008 as a print server, printing via the Windows Print Server is recommended. If you cannot use the Windows Print Server in your network, use LPR print instead.

### Cannot print properly with AppleTalk print

**Problem Description**
- Text will be printed as striped lines for an email message.
- Some text is not printed in a document.
- When a web browser is used, the web page is not printed in spite of the print job being sent to the equipment.

**Corrective Action**
If the errors above occur with AppleTalk print, use LPR print instead.
## Client Problems

This section describes how to identify and correct the problems caused by the clients* connected to the equipment.

* One of the common examples of clients is a computer that sends a print job to the equipment and makes it perform printing.

### Checking the client status

#### Problem Description

The printing problems are caused by the printer driver settings, network settings, errors in the network connections, and so forth. First, contact the administrator of the equipment to see if there is one of these kinds of problems, or see the following sections:

- P.86 “Printer Driver Problems”
- P.88 “Network Connection Problems”
- P.102 “Printing Problems (Network Related)”

Another possible cause is one related to a client. If the print jobs sent from a specific client within a network fail, the problem may be caused by the client.

The checklist below will help you identify the source of the error and direct you to information resolving the problem. If the problem persists after you have followed all of the steps, contact your service representative.

<table>
<thead>
<tr>
<th>No.</th>
<th>Check...</th>
<th>Yes</th>
<th>No</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Does the equipment work properly? Are copy jobs output properly?</td>
<td>Next Step 3</td>
<td>☑</td>
<td>Check the device status displayed in the Device page of TopAccess.</td>
</tr>
<tr>
<td>2</td>
<td>See the Device page of TopAccess. Are the options specified for the job supported by the hardware configuration?</td>
<td>Next Step 3</td>
<td>☑</td>
<td>If not, delete the job, install the required components, and try again. Contact your service representative for further information.</td>
</tr>
<tr>
<td>3</td>
<td>Can you print the jobs from other clients?</td>
<td>Next Step 3</td>
<td>☑</td>
<td>See the following section to fix the problem. P.88 “Cannot print with the equipment (network connection problems)”</td>
</tr>
<tr>
<td>4</td>
<td>Have you ever printed successfully from this client?</td>
<td>Next Step 3</td>
<td>☑</td>
<td>See the following section to fix the problem. P.86 “Cannot print (port setting problems)”</td>
</tr>
<tr>
<td>5</td>
<td>Did you set up the printer driver other than by an SMB connection?</td>
<td>Next Step 3</td>
<td>☑</td>
<td>See the following section to fix the problem. P.88 “Cannot print with SMB print”</td>
</tr>
<tr>
<td>6</td>
<td>(For Macintosh only) Can you see the equipment you created in the Selector?</td>
<td>Next Step 3</td>
<td>☑</td>
<td>Refer to the Software Installation Guide.</td>
</tr>
<tr>
<td>7</td>
<td>At this point, the problem is most likely to be related to a client-side error. Refer to the Printing Guide to fix the problem.</td>
<td>☑</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Hardware Problems

This section describes troubles caused by the hardware device (the equipment).

If an icon or a message indicating an error is not displayed, or the problems in the printer drivers or the network connection cannot be specified, a hardware problem is a possible cause of the trouble.

The following are common factors involved in the hardware problems:

- System board, cables, and connectors
- The equipment, and its (optional) components such as the duplexing unit or the Finisher
- System software or firmware of the equipment

### Print jobs not output

**Problem Description**

All the clients within a network fail to make the equipment output the print jobs.

**Corrective Action**

There remains a possibility that improper settings of the software such as printer drivers caused the problem. However, a hardware error is possible, if none of the clients can print the jobs. Try the steps on the checklist below. If the problem persists after you have followed all of the steps, contact your service representative.

<table>
<thead>
<tr>
<th>No</th>
<th>Check...</th>
<th>Yes</th>
<th>No</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Is printing prohibited from all connected client computers?</td>
<td>Next Step</td>
<td>Yes</td>
<td>See the following section to fix the problem: P.88 “Network Connection Problems”</td>
</tr>
<tr>
<td>2</td>
<td>Can you see the job from TopAccess or another print monitoring utility, such as PCONSOLE or Print Manager?</td>
<td>Next Step</td>
<td>No</td>
<td>See the following section to fix the problem: P.98 “Locating the Equipment in the Network”</td>
</tr>
<tr>
<td>3</td>
<td>Can you identify the problem with the error message or the error code and resolve it?</td>
<td>End</td>
<td>Yes</td>
<td>See the following sections to fix the problem: P.112 “Error Messages” P.114 “Error Codes”</td>
</tr>
</tbody>
</table>

Also refer to the *Printing Guide* for more information on resolving output errors caused by software settings.
TROUBLESHOOTING FOR SCANNING

This chapter describes how to troubleshoot the problems of scanning.

Scanning Problems ................................................................................................................ 92
- Cannot E-mail my scans .............................................................................................................92
- Cannot find the data saved in the shared folder .....................................................................92
Scanning Problems

This section describes troubleshooting for using scan data.

■ Cannot E-mail my scans

Problem Description
I have scanned a document and sent the copy as an e-mail attachment, but the e-mail does not reach the specified e-mail address.

Corrective Action
Check the following points:
• The correct e-mail addresses are specified.
• The equipment is correctly configured for and connected to the network.
• For the SMTP Client settings, the SMTP server address is correctly set.
• For the SMTP Client settings, the Port Number is correctly set.
• For the SMTP Client settings, the settings for SSL and/or authentication are correctly set.
• The data size of the attached file is smaller than/equal to the maximum data size receivable on the recipient’s side.

For details on the network settings, refer to the TopAccess Guide.
For details on e-mailing the scanned image, refer to the Scanning Guide.

■ Cannot find the data saved in the shared folder

Problem Description
I have scanned a document and saved the copy in the shared folder of the equipment, but cannot locate the saved file.

Corrective Action
• For Windows OS, search the network for the equipment using the search function of Explorer. The data are stored in the equipment’s shared folder named “FILE_SHARE.”
• For Macintosh, make sure that the OS version is Mac OS X 10.3.x or later; a client computer running Mac OS X 10.2.x or earlier cannot access the shared folder on the equipment. If your computer is running Mac OS X 10.3.x or later, search the network for the equipment on Finder and access the folder named “FILE_SHARE.”
• If you cannot find the equipment on the network, make sure that the SMB Server Protocol setting is enabled on TopAccess.

For details on the network settings, refer to the TopAccess Guide.
For details on storing the scanned image, refer to the Scanning Guide.
TROUBLESHOOTING FOR e-Filing

This chapter describes how to troubleshoot the problems on e-Filing.

**e-Filing Web Utility Problems**
- e-Filing Web Utility terminates the session ................................................................. 94
- Numerous sub windows repeatedly appear ................................................................. 94
- Displaying the items in the Contents Frame takes a long time ................................. 94
- Error messages ........................................................................................................... 95
e-Filing Web Utility Problems

This section describes troubleshooting for the web browser-based e-Filing web utility. You will also find the error messages and the corrective actions for each message.

■ e-Filing Web Utility terminates the session

Problem Description
The message “This operation will end your e-Filing session.” appears and e-Filing Web Utility returns to its top page.

Corrective Action 1
Clicking the [Return], [Refresh], and [home] button or [login] link leads to this message and e-Filing Web Utility returns to its top page. In this case, try again to do the operation you intended.

Corrective Action 2
Closing the window by clicking the [x] button of the browser leads to the message “This operation will end your e-Filing session.” and the e-Filing session ends. Finish your current operation before you close the window.

Corrective Action 3
Operating the main window while the sub window is displayed leads to the message “This operation will end your e-Filing session.” and the processing displayed on the sub window ends. Do not operate the main window until the processing on the sub window has been completed.

■ Numerous sub windows repeatedly appear

Problem Description
Numerous sub windows repeatedly appear and e-Filing becomes uncontrollable.

Corrective Action
Close all the windows and exit from the web browser. Then restart the browser and clear the cookie files from “Internet Option” (for Internet Explorer).

■ Displaying the items in the Contents Frame takes a long time

Problem Description
Displaying the items in the Contents Frame takes a long time.

Corrective Action
Displaying more than 100 items in the Contents Frame may take a long time. Fewer items can be displayed more quickly.
### Error messages

See the table below to troubleshoot the problem if a message appears.

<table>
<thead>
<tr>
<th>Message</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Internal error occurred. Please restart e-Filing.</td>
<td>Turn the power of the equipment OFF and then ON and then try again. If the error message is still displayed, contact your system administrator or contact your dealer for support.</td>
</tr>
<tr>
<td>Your e-Filing Session has Timed Out. Please Restart.</td>
<td>Exit from e-Filing and change the session timer setting to be longer on the Setup page of the TopAccess Administrator mode. Then restart it.</td>
</tr>
<tr>
<td>The items have been modified.</td>
<td>The items are currently being modified by another user. Try again after the other user has finished.</td>
</tr>
<tr>
<td>Cannot start e-Filing Session. The Disk is Full.</td>
<td>Erase the unnecessary data from the Control Panel. For instructions on how to delete data from the Control Panel, refer to the e-Filing Guide.</td>
</tr>
<tr>
<td>Cannot create a Box. The Disk is full.</td>
<td>Erase unnecessary data using the administrative function or deleting the data in boxes for making hard disk space.</td>
</tr>

TROUBLESHOOTING FOR NETWORK CONNECTIONS

This chapter describes how to troubleshoot the problems on network connections.

Locating the Equipment in the Network

- Cannot locate the equipment in the network ................................................................. 98
- Cannot locate the equipment with Local Discovery ......................................................... 99
- Equipment does not respond to ping command ............................................................. 100

LDAP Search and Authentication Problems

- Network shutdown occurs or touch panel disabled after LDAP search ........................ 101
- LDAP authentication takes a long time ............................................................................ 101

Printing Problems (Network Related)

- SMB print in a Windows operating system environment .................................................. 102
- Raw TCP or LPR print in a Windows operating system environment ............................ 102
- IPP print in a Windows operating system environment ...................................................... 103
- Novell print in a NetWare environment .......................................................................... 103
- Macintosh environment .................................................................................................. 104
- UNIX/Linux environment ............................................................................................... 104

Network Fax (N/W-Fax) Driver Problems

- N/W-Fax Driver Installation Error Messages ................................................................. 105
- N/W-Fax Driver General Errors ....................................................................................... 106

Client Software Authentication Problems

- Cannot log in using client software ................................................................................ 108
Locating the Equipment in the Network

Problem Description
I cannot locate the equipment in the network.

Corrective Action
Improper settings may cause problems in locating the equipment in the network. Try the checklist below to detect the cause of the problem. If the problem remains unsolved, contact your service representative.

<table>
<thead>
<tr>
<th>No.</th>
<th>Check...</th>
<th>Yes</th>
<th>No</th>
<th>Corrective Action</th>

### Cannot locate the equipment with Local Discovery

**Problem Description**
Local Discovery cannot detect the equipment.

**Corrective Action**
The equipment is normally located automatically by SNMP. When the TWAIN driver, File Downloader, Address Book Viewer, Backup/Restore Utility, Remote Scan driver, N/W-Fax driver or printer driver cannot automatically discover the equipment over the network, the most likely cause is limitations of the protocols supported by the computer. In some cases, you need to add or update network components; however, first see the checklist below to fix the problem.

<table>
<thead>
<tr>
<th>No.</th>
<th>Check...</th>
<th>Yes</th>
<th>No</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Is SNMP enabled on the equipment?</td>
<td>Next Step ∞</td>
<td></td>
<td>Enable the SNMP (MIB).</td>
</tr>
<tr>
<td>2</td>
<td>Are the SNMP setting of the equipment and that of the software the same?</td>
<td>Next Step ∞</td>
<td></td>
<td>SNMP V1/V2: Check if the community names of the equipment and the software are the same. SNMP V3: Check if each item of the SNMP setting of the equipment and the software is the same.</td>
</tr>
<tr>
<td>3</td>
<td>Confirm that the protocol suite installed on the client computer has been updated with the latest software for the given operating system. If your network only supports the IPX/SPX protocol, make sure that the most current version of Novell Client software is installed.</td>
<td>Next Step ∞</td>
<td></td>
<td>See the vendor’s website for information about product updates and technical supports.</td>
</tr>
<tr>
<td>4</td>
<td>Print an NIC Configuration page from the equipment. Does the equipment support the same protocol as the network?</td>
<td>Next Step ∞</td>
<td></td>
<td>Configure the proper protocol.</td>
</tr>
<tr>
<td>5</td>
<td>Change the protocol settings from TopAccess, if necessary, and reboot the equipment for the changes to take effect. Repeat step 2. Was the device discovered?</td>
<td>End</td>
<td>Next Step ∞</td>
<td></td>
</tr>
<tr>
<td>6</td>
<td>Check the NIC Configuration page. Are the IP address and subnet mask settings correct?</td>
<td>Next Step ∞</td>
<td></td>
<td>Setup the TCP/IP settings correctly.</td>
</tr>
<tr>
<td>7</td>
<td>Check the router to make sure that it is not filtering out the equipment packets. Is the router processing equipment packets correctly?</td>
<td>Next Step ∞</td>
<td></td>
<td>Adjust the router settings.</td>
</tr>
<tr>
<td>8</td>
<td>Can another computer within the same network segment discover the equipment?</td>
<td>Next Step ∞</td>
<td></td>
<td>See the following section to fix the problem: <a href="#">P.98 “Locating the Equipment in the Network”</a></td>
</tr>
<tr>
<td>9</td>
<td>Check the NIC Configuration page. Is the Unit Serial Number part of the device name?</td>
<td>Next Step ∞</td>
<td></td>
<td>Contact your service representative.</td>
</tr>
<tr>
<td>10</td>
<td>Check link activities on the port being used by the equipment and the integrity of the network cable, hub, or switch that connects the equipment to the network. Replace any network components that you can tell or suspect are faulty.</td>
<td>End</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
# Equipment does not respond to ping command

**Problem Description**
The equipment does not respond to a ping command.

**Corrective Action**
Check the network settings following the checklist below.

<table>
<thead>
<tr>
<th>No.</th>
<th>Check...</th>
<th>Yes</th>
<th>No</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Confirm that the TCP/IP protocol suite is installed on the client computer.</td>
<td>Next Step</td>
<td></td>
<td>Refer to the networking section of your operating system documentation.</td>
</tr>
<tr>
<td>2</td>
<td>Look at the NIC configuration page and confirm that the TCP/IP settings are correct. Is the IP address entered and valid? Are the Gateway and Subnet settings correct?</td>
<td>Next Step</td>
<td></td>
<td>Enter the correct TCP/IP settings.</td>
</tr>
<tr>
<td>3</td>
<td>Reboot the equipment. Check the NIC Configuration page that is printed out. Are the TCP/IP settings correct?</td>
<td>Next Step</td>
<td></td>
<td>The settings are not binding, contact your service representative.</td>
</tr>
<tr>
<td>4</td>
<td>Try to ping the equipment again. Did the equipment respond to the ping?</td>
<td>End</td>
<td>Next Step</td>
<td></td>
</tr>
<tr>
<td>5</td>
<td>Can you ping the equipment from any other computer within the same network? If not, the equipment might have an IP address that is out of range or invalid.</td>
<td>Next Step</td>
<td></td>
<td>Contact your local network specialist for a valid IP address for the equipment.</td>
</tr>
<tr>
<td>6</td>
<td>Can you ping to another computer within the same network?</td>
<td>Next Step</td>
<td></td>
<td>Check the computer’s protocol settings to make sure the gateway and subnet settings are correct.</td>
</tr>
<tr>
<td>7</td>
<td>If you have customized the device name, you can check if the NIC is functional by restoring the default settings. When the equipment automatically reboots and an NIC Configuration page is printed, does the device name include the NIC’s unit serial number?</td>
<td>Next Step</td>
<td></td>
<td>The NIC is faulty or improperly installed. Contact your service representative.</td>
</tr>
<tr>
<td>8</td>
<td>Check link activities on the port being used by the equipment and also the integrity of the network cable, hub, or switch that is connecting the equipment to the network. Replace any network components that you suspect are faulty. Can you ping the equipment now?</td>
<td>End</td>
<td></td>
<td>Contact your service representative.</td>
</tr>
</tbody>
</table>
LDAP Search and Authentication Problems

Network shutdown occurs or touch panel disabled after LDAP search

Problem Description
After performing the LDAP search, the network shutdown occurs or the touch panel is disabled.

Corrective Action
Try the checklist below. If the problem remains unsolved, contact your service representative.

<table>
<thead>
<tr>
<th>No.</th>
<th>Check...</th>
<th>Yes</th>
<th>No</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Is the LDAP server correctly running?</td>
<td>Next Step</td>
<td>Yes</td>
<td>Confirm that the LDAP server is correctly running.</td>
</tr>
<tr>
<td>2</td>
<td>Is the LDAP server setting correctly set?</td>
<td>End</td>
<td>No</td>
<td>Enter the correct LDAP setting. Re-enter the correct password carefully because it is displayed by asterisks.</td>
</tr>
</tbody>
</table>

LDAP authentication takes a long time

Problem Description
It takes a long time to perform LDAP authentication on the touch panel.

Corrective Action
Try the checklist below. If the problem remains unsolved, contact your service representative.

<table>
<thead>
<tr>
<th>No</th>
<th>Check...</th>
<th>Yes</th>
<th>No</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Is the LDAP server correctly running?</td>
<td>Next Step</td>
<td>Yes</td>
<td>Confirm that LDAP server is correctly running.</td>
</tr>
<tr>
<td>2</td>
<td>Is the LDAP server setting correctly set?</td>
<td>End</td>
<td>No</td>
<td>Enter the correct LDAP setting. Reenter the correct password carefully because it is displayed by asterisks.</td>
</tr>
</tbody>
</table>
Printing Problems (Network Related)

Among the several ways to use the equipment in the network, the simplest one is to set the equipment in the TCP/IP environment using a DHCP server to assign IP addresses dynamically to devices. Using the default settings also assures an easier network implementation, although you may be required to customize the settings to accommodate them in your particular environment.

Some common network configurations are shown below, along with the steps required to configure the equipment. If you perform all the steps in the applicable checklist and still cannot print satisfactorily with the equipment, contact your service representative.

**Tips**
- You can change the network protocol settings with the touch panel of the equipment or with TopAccess (the Administration page).
- For the error messages that appear during the installation of the printer drivers, refer to the Software Installation Guide.

### SMB print in a Windows operating system environment

<table>

</table>
Network Fax (N/W-Fax) Driver Problems

This section describes the troubleshooting for the Network Fax (N/W-Fax) driver.

N/W-Fax Driver Installation Error Messages

Note

For information on the installation of the N/W-Fax driver, refer to the Software Installation Guide.

Setup needs to copy Windows NT files

Problem description
The wrong port type was selected from the Printer Ports dialog.

Corrective action
1. Click Cancel until the Add Printer Wizard terminates.
2. Select [Add Printer] from the [File] menu in the Printers folder to start the Add Printer Wizard, and then perform the installation again.
3. When the screen for selecting a port is displayed, select [Local port] to add a printer.

Client software CD now required

Problem description
When adding a new printer driver, the end user did not choose the Have Disk option; instead, the user selected the printer name from the Add Printer list.

Corrective action
1. Cancel the Add Printer Wizard.
2. Select [Add Printer] from the [File] menu in the printer folder to start the Add Printer Wizard, and perform the installation again.
3. When the screen for selecting a printer is displayed, select [Have Disk].
4. Select [Use Existing Driver] to add another copy of an existing driver or browse to the subdirectory that contains the appropriate *.inf file.

File *.DRV on client CD could not be found

Problem description
When adding a new printer driver, the user did not choose the Have Disk option but selected the printer name from the Add Printer list.

Corrective action
1. Cancel the Add Printer Wizard.
2. Select [Add Printer] from the [File] menu in the printer folder to start the Add Printer Wizard, and perform the installation again.
3. When the screen for selecting a printer is displayed, select [Have Disk].
4. Browse to the subdirectory that contains the appropriate *.inf file.
Location does not contain information about your hardware

Problem description
The path to the *.inf file selected during driver installation is too far away. In other words, there are too many characters in the directory path.

Corrective action
Copy the directory containing the *.inf file to the local drive and resume installation.

This port is currently in use

Problem description
The driver was either opened, printing a job, or in use by another printer or application, when you attempted to delete it.

Corrective action
Make sure all print jobs have been completed before deleting a port. If there are still problems, exit all applications and try again. Check each driver to see if another driver is using the same port. If so, first change the driver’s port setting and delete the port.

Problem with the current printer setup

Problem description
The driver was not set up properly, possibly because the installation procedure was not completed.

Corrective action
Delete the driver and either reinstall it from the Client Utilities CD-ROM or download it from this equipment.

N/W-Fax Driver General Errors

“Could not connect to the MFP device” appears

Problem description
When users are trying to access the properties of the N/W-Fax driver, an error message “Could not connect to the MFP device” appears.

Corrective action
Communication between the N/W-Fax driver and this equipment failed. Make sure that this equipment is operating. If not, turn its power ON. Connect the N/W-Fax driver with this equipment through the TopAccess. If the connection fails, reboot the computer and this equipment.

The fax jobs are not listed on the “Logs - Transmission” screen in TopAccess

Problem description
When confirming the fax job logs on the “Logs - Transmission” screen in TopAccess, the fax jobs that are sent are not displayed.

Corrective action
If the relevant fax job is not included in the Log list, your transmission job may not have been performed. In this case, search for jobs without the department code in the “JOB STATUS - FAX” on the control panel. Then select the relevant fax job and press the [SEND] button to resend it.
Fax transmission cannot be performed with a cover sheet

Problem description
In a N/W-Fax driver which is set to the IPP port, no cover sheet is output and an XL error occurs in the fax transmission when a printer driver whose file name consists of 54 letters or more is specified for the default printer and a Fax is sent with a cover sheet added from Microsoft Excel.

Corrective action
Set the file name of the printer driver in 30 letters or less.
Client Software Authentication Problems

■ Cannot log in using client software

Problem Description
I cannot log into the equipment using client software.

Corrective Action
If you cannot log into the equipment using client software, contact the administrator of the equipment. Since the user name and password registered in the client software are used for authentication in the case of automatic login, the log-in screen may not be displayed.
CHECKING THE EQUIPMENT STATUS WITH TopAccess

This chapter describes how to check the status of the equipment with TopAccess.

- Hardware Status Icons on TopAccess [Device] Tab .............................................................. 110
- Error Messages .................................................................................................................... 112
- Error Codes ........................................................................................................................ 114
  - Error codes on print jobs ............................................................................................... 114
  - Error codes on transmission and reception ................................................................. 115
  - Error codes on scan jobs .............................................................................................. 117
Hardware Status Icons on TopAccess [Device] Tab

When the equipment requires maintenance or when an error occurs with the equipment, the icons indicating the status information appear near the graphic image of the equipment on the TopAccess [Device] tab. The following are the icons displayed and their descriptions.

For details of the [Device] tab of TopAccess, refer to the *TopAccess Guide*.

**Printer Error 1**

This icon indicates a non-recommended toner cartridge is used and that the equipment has stopped printing.  
P.59 “Replacing a Toner Cartridge”

**Printer Error 2**

This icon indicates:
- You need to remove paper from the exit tray of the equipment.
- You need to remove paper from the receiving tray of the Finisher.
- You need to remove the staples jammed in the Finisher.  
  P.50 “Staple jam in the finisher”
- You need to remove the staples jammed in the Saddle Stitch unit.  
  P.56 “Staple jam in the Saddle Stitch unit”
- You need to remove the staples jammed in the Saddle Stitch unit.
- You need to remove the staples jammed in the Saddle Stitch unit.
- You need to remove the staples jammed in the Saddle Stitch unit.
- You need to clear the hole punch paper bits from the Hole Punch Unit.  
  P.74 “Cleaning the Hole Punch Dust Bin”
- The recommended toner cartridge is not being used.  
  P.59 “Replacing a Toner Cartridge”
- You tried to perform saddle stitching for a printing on mixed paper sizes.
- The equipment cannot load paper from the drawer of the External Large Capacity Feeder.
- The equipment cannot eject the paper to the exit tray of the equipment.

**Cover Open**

This icon indicates the front cover is open.

**Toner Empty**

This icon indicates no toner is left. It also indicates which color is empty:  
P.59 “Replacing a Toner Cartridge”

**Waste Toner Full**

This icon indicates the waste toner box is full and requires replacing.
Paper Empty

This icon indicates no paper is left in a drawer. Refer to the *Copying Guide*.

Paper Jam

This icon indicates a paper jam occurred. It also indicates the location of the paper jam. *P.14 “Clearing a Paper Jam”*

Staples Empty

This icon indicates no staples are left in the Finisher. *P.65 “Refilling With Staples”*

Call for Service

Contact your service representative to have the equipment inspected.
Error Messages

When a message appears on the [Device] Tab of TopAccess, see the table below for the corrective action.

Error Codes

TopAccess has the pages for the job lists; print, transmission, reception, and scan jobs. The following error codes are shown on these pages in the [Logs] tab (successful jobs have no codes). These codes help you specify the cause of an error you might encounter.

**Note**

Error codes concerning color printing are displayed only on MFPs and copiers that support color printing.

**Tip**

The error codes are also shown on the [LOG] window of the touch panel. See the following lists when you find an error code on the touch panel.

## Error codes on print jobs

<table>
<thead>
<tr>
<th>Error Code</th>
<th>Problem Description</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>4011</td>
<td>Job canceled</td>
<td>The job was canceled.</td>
</tr>
<tr>
<td>4021</td>
<td>Power failure</td>
<td>Check whether the power cable is connected properly and is inserted securely.</td>
</tr>
<tr>
<td>4031</td>
<td>HDD full error</td>
<td>Delete unnecessary private print jobs and invalid department print jobs.</td>
</tr>
<tr>
<td>4041</td>
<td>User authentication error</td>
<td>The user performing the printing has not been authenticated or registered. Perform user authentication or user registration.</td>
</tr>
<tr>
<td>4042</td>
<td>Department code authentication error</td>
<td>Check the information about the department code registered in this equipment.</td>
</tr>
<tr>
<td>4045</td>
<td>There is something wrong with the connection with the LDAP server or its authority setting.</td>
<td>Ask your LDAP server administrator about it.</td>
</tr>
<tr>
<td>4111</td>
<td>The number of prints has become &quot;0&quot;</td>
<td>The number of prints specified in department and user management has become &quot;0&quot; at the same time. Set the number again or perform initialization.</td>
</tr>
<tr>
<td>4112</td>
<td>The number of prints has become &quot;0&quot;</td>
<td>The number of prints specified in user management has become &quot;0&quot;. Set the number again or perform initialization.</td>
</tr>
<tr>
<td>4113</td>
<td>The number of prints has become &quot;0&quot;</td>
<td>The number of prints specified in department management has become &quot;0&quot;. Perform initialization.</td>
</tr>
<tr>
<td>4121</td>
<td>Job cancellation due to the external counter error</td>
<td>1. Put in a coin and perform printing again. 2. Insert a card and perform printing again or contact your administrator. 3. Insert the Key Counter and perform printing again. 4. Clear the Schedule Print setting and perform printing again.</td>
</tr>
<tr>
<td>4211</td>
<td>Printing data storing limitation error</td>
<td>Printing with the data being stored to the HDD temporarily (Proof print, Private print, Scheduled print, etc.) cannot be performed. Use normal printing.</td>
</tr>
<tr>
<td>4212</td>
<td>e-Filing storing limitation error</td>
<td>Printing with the data being stored to the HDD (print and e-Filing, print to e-Filing, etc.) cannot be performed. Use normal printing.</td>
</tr>
<tr>
<td>4213</td>
<td>File storing limitation error</td>
<td>The file storing function is set to “disabled”. Check the setting of the equipment.</td>
</tr>
<tr>
<td>4214</td>
<td>Fax/iFax transmission failure</td>
<td>The Fax/iFax transmission or N/W-Fax/iFax function is set to “disabled”. Check the setting of the equipment.</td>
</tr>
<tr>
<td>4221</td>
<td>Private-print-only error</td>
<td>Jobs other than Private printing cannot be printed. Perform Private printing.</td>
</tr>
<tr>
<td>4241</td>
<td>No Printer Kit/Printer Kit expired</td>
<td>Install the Printer Kit or Printer/Scanner Kit correctly before printing. Please register if the trial period of the Printer Kit or Printer/Scanner Kit has expired.</td>
</tr>
<tr>
<td>4242</td>
<td>No Scanner Kit/Scanner Kit expired</td>
<td>Although the Printer Kit is installed, the Scanner Kit is not installed; therefore, the Internet Fax function and Save as file function using the N/W-Fax driver are not available. Install the Scanner Kit correctly and try again. Please register if the trial period of the Scanner Kit has expired.</td>
</tr>
<tr>
<td>4311</td>
<td>No authority to execute a job</td>
<td>The user has not been authorized to perform this operation. Ask your administrator.</td>
</tr>
<tr>
<td>4312</td>
<td>Not authorized to store a file</td>
<td>The user has not been authorized to perform this operation. Ask your administrator.</td>

<td>3C10, 3C13</td>
<td>TIFF analysis error</td>
<td>Ask the sender to resend the Email with attached files that are TIFF format.</td>
</tr>
<tr>
<td>3C20</td>
<td>TIFF compression error</td>
<td>Ask the sender to resend the Email with attached TIFF files in the MH, MR, MMR, or JBIG compression.</td>
</tr>
<tr>
<td>3C30</td>
<td>TIFF resolution error</td>
<td>Ask the sender to resend the Email with attached TIFF files whose resolution is either 200 x 100, 200 x 200, 200 x 400, 300 x 300, or 400 x 400 dpi.</td>
</tr>
<tr>
<td>3C40</td>
<td>TIFF paper size error</td>
<td>Ask the sender to resend the Email with attached TIFF files that can be printed on paper permitted for the equipment.</td>
</tr>
<tr>
<td>3C50</td>
<td>Offramp transmission error</td>
<td>Ask the sender to specify the correct fax numbers and resend the Email.</td>
</tr>
</tbody>
</table>
### Error codes on scan jobs

#### Error Code 3C60
- **Problem Description**: Offramp security error
- **Corrective Action**: Confirm that the specified fax numbers are registered in the address book of the equipment. If not, register the fax numbers in the address book and ask the sender to resend the Email with the correct fax numbers.

#### Error Code 3C70
- **Problem Description**: Power failure
- **Corrective Action**: Confirm that the job is recovered or not. If not, ask the sender to resend the Email.

#### Error Code 3C90
- **Problem Description**: OffRamp Fax transmission disable error
- **Corrective Action**: Confirm if the Fax Send Function of MFP setting is disable or not.

#### Error Code 3D10
- **Problem Description**: Destination address error
- **Corrective Action**: Ask your administrator whether the DNS and mail server settings are correctly set. If they are, ask the sender to confirm that the destination address is correct.

#### Error Code 3D20
- **Problem Description**: Exceeding maximum offramp destinations
- **Corrective Action**: Ask the sender to specify up to 40 destinations for one offramp gateway job. The equipment cannot perform offramp gateway transmission for more than 40 destinations.

#### Error Code 3D30
- **Problem Description**: Fax unit is not installed
- **Corrective Action**: Make sure that the Fax unit is installed, or connected correctly.

#### Error Code 3E10
- **Problem Description**: POP3 server communication error
- **Corrective Action**: Ask your administrator whether the POP3 server address is correctly set, and whether the POP3 server works properly. If SSL is enabled, make sure that SSL port number is correctly set.

#### Error Code 3E20
- **Problem Description**: POP3 server communication timeout
- **Corrective Action**: Ask your administrator whether the POP3 server works properly and the LAN cable is connected to the server.

#### Error Code 3E30
- **Problem Description**: POP3 login error
- **Corrective Action**: Ask your administrator whether the POP3 user name and password are set correctly.

#### Error Code 3E40
- **Problem Description**: POP3 login type error
- **Corrective Action**: Ask your administrator whether the POP3 login type (Auto, POP3, APOP) is set correctly.

#### Error Code 3F10, 3F20
- **Problem Description**: File I/O error
- **Corrective Action**: Ask the sender to resend the Email. If the error still occurs, contact your service representative.

### Error codes on email jobs

#### Error Code 2C10, 2C12, 2C13, 2C20-2C22
- **Problem Description**: Wrong Job status
- **Corrective Action**: A system error has occurred during the sending of an Email. Try it again. If the error still persists, contact your service representative.

#### Error Code 2C11
- **Problem Description**: Not enough memory
- **Corrective Action**: Complete any running jobs first before reperforming the job in error. If the error still persists, turn the power OFF and then back ON, and then try again.

#### Error Code 2C14
- **Problem Description**: Invalid parameter specified
- **Corrective Action**: If you are using a template, create it again. If the error still persists, turn the power OFF and then back ON, and then try again.

#### Error Code 2C15
- **Problem Description**: Mail size exceeded limit or maximum size
- **Corrective Action**: You are sending too many documents at a time. Send them separately.

#### Error Code 2C30-2C33
- **Problem Description**: Disk access error
- **Corrective Action**: Complete any running jobs first before reperforming the job in error. If the error still persists, turn the power OFF and then back ON, and then try again.

#### Error Code 2C40
- **Problem Description**: Failed to convert image file format
- **Corrective Action**: This error occurs when conversion to a highly compressed PDF format fails. Do the scanning again. If the error still persists, Use the normal PDF format. When this error occurs in conversion other than to a highly compressed PDF format, turn the power OFF and then back ON. Then try to scan again. If the error still persists, contact your service representative.

#### Error Code 2C43
- **Problem Description**: Encryption error. Failure to create a file
- **Corrective Action**: If the error still persists after reattempting, turn the power OFF and then back ON. Then make another effort.

  Originals and paper ..................................................................................................................... 126

Regular Maintenance ..................................................................................................................... 126
When You Think Something Is Wrong With the Equipment

If you think there is something wrong with the equipment, check the following items.

Tips
- To see the functions of the equipment such as copy or print, refer to their operator’s manuals (the Copying Guide and the Printing Guide respectively).
- Checking the operations or procedures may help you solve the problems. When you have what is not clear in operating the equipment or you think something is wrong with it, the operator’s manual for the function you are using will be helpful.

■ General operations

<table>
<thead>
<tr>

<tbody>
<tr>
<td>The equipment does not work at all.</td>
<td>The power cord is not securely inserted into the outlet.</td>
<td>Insert the power cord into the outlet until it comes to a stop.</td>
</tr>
<tr>
<td>No icons or signs are displayed on the touch panel. (The MAIN POWER lamp, the ON/OFF lamp and the [ENERGY SAVER] button light.)</td>
<td>The equipment is in the Sleep mode.</td>
<td>Press any of the [START], [COPY], [e-FILING], [SCAN], [PRINT], [FAX] and [ENERGY SAVER] buttons to clear the Sleep mode. Refer to the Quick Start Guide.</td>
</tr>
<tr>
<td>No icons or signs are displayed on the touch panel. (Only the MAIN POWER lamp lights.)</td>
<td>The power of the equipment is not turned ON.</td>
<td>Press and hold the [POWER] button until the ON/OFF lamp lights.</td>
</tr>
<tr>
<td>The touch panel is dim.</td>
<td>The contrast of the touch panel is adjusted lower.</td>
<td>Adjust the contrast lighter. Refer to the MFP Management Guide.</td>
</tr>
<tr>
<td>The button does not respond to my operation. (&quot;Saving energy Press START button&quot; appears on the touch panel.)</td>
<td>The equipment is in the energy saving mode.</td>
<td>Press any of the [START], [COPY], [e-FILING], [SCAN], [PRINT], [FAX] and [ENERGY SAVER] buttons to clear the energy saving mode. Refer to the Quick Start Guide.</td>
</tr>
<tr>
<td>The button does not respond to my operation. (The MAIN POWER lamp, the ON/OFF lamp and the [ENERGY SAVER] button light.)</td>
<td>The equipment is in the Sleep mode.</td>
<td>Press any of the [START], [COPY], [e-FILING], [SCAN], [PRINT], [FAX] and [ENERGY SAVER] buttons to clear the Sleep mode. Refer to the Quick Start Guide.</td>
</tr>
<tr>
<td>The button does not respond to my operation. (Only the MAIN POWER lamp lights.)</td>
<td>The power of the equipment is not turned ON.</td>
<td>Press and hold the [POWER] button until the ON/OFF lamp lights.</td>
</tr>
<tr>
<td>The equipment is in the Super Sleep mode.</td>
<td>Press and hold the [POWER] button until the ON/OFF lamp lights to clear the Super Sleep mode. Refer to the Quick Start Guide.</td>
<td></td>
</tr>
<tr>
<td>The window “Enter Department Code” appears.</td>
<td>The equipment is managed under the department management function.</td>
<td>Enter your department code. If you do not know it, contact the administrator of the equipment.</td>
</tr>
<tr>
<td>The window “Enter the user name and Password” appears.</td>
<td>The equipment is managed under the user management function.</td>
<td>Enter your user name and password. If you do not know them, contact the administrator of the equipment.</td>
</tr>
<tr>
<td>A message is displayed on the touch panel.</td>
<td>Some trouble occurred in the equipment (or the message is displayed just for an ordinary operation).</td>
<td>See the meaning of the message referring to the listing below. P.11 “Messages Displayed on the Touch Panel”</td>
</tr>
</tbody>
</table>
### Originals and paper

<table>
<thead>
<tr>
<th>Problem Description</th>
<th>Cause</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>The original is jammed.</td>
<td>The original is unavailable on the equipment.</td>
<td>Check whether the original is available on the equipment. For details, refer to Chapter 2 of the <em>Copying Guide</em>.</td>
</tr>
<tr>
<td>Paper is jammed.</td>
<td>The paper is unavailable on the equipment.</td>
<td>Check whether the paper is available on the equipment. For details, refer to Chapter 1 of the <em>Copying Guide</em>.</td>
</tr>
<tr>
<td></td>
<td>The paper size setting registered for the equipment is inconsistent with paper in a drawer or on the bypass tray.</td>
<td>Match the size of the paper placed in the drawer or on the bypass tray and the size registered on the equipment. For Details, refer to Chapter 1 and 2 of the <em>Copying Guide</em>.</td>
</tr>
<tr>
<td></td>
<td>The stack of paper exceeds the loading line indicated on the side guide.</td>
<td>Remove some paper to set it within the height limit line indicated on the side guide.</td>
</tr>
<tr>
<td></td>
<td>There is too much space between the paper and the side and end guides of the drawer.</td>
<td>Adjust the space between the paper and the side guide or the end guide not to take much space. If the thick paper is jammed, take a little space between the paper and the side guide. For details, refer to Chapter 1 of the <em>Copying Guide</em>.</td>
</tr>
<tr>
<td>Hidden jammed paper has not been removed.</td>
<td></td>
<td>Check the sign again on the touch panel to see where the jam occurred. P.14 &quot;Clearing a Paper Jam&quot;</td>
</tr>
<tr>
<td>Two or more sheets of paper are fed together.</td>
<td>Sheets of paper are stuck together.</td>
<td>Loosen the stack of paper well and set them again.</td>
</tr>
<tr>
<td>Sheets do not align when exiting.</td>
<td>Sheets are placed in the drawer with the wrong side up.</td>
<td>Check the printing side of the sheets and place them correctly. Information about the printing side may be given on the wrapping paper of the sheets. If you cannot find which side is the printing side, try printing on both sides to see if the sheets align when exiting.</td>
</tr>
<tr>
<td>The message indicating no paper does not disappear even after paper is placed in the drawer.</td>
<td>Sheets placed in the drawer are not aligned.</td>
<td>Remove the sheets from the drawer, align them, and replace them.</td>
</tr>
<tr>
<td></td>
<td>The side and end guides do not match the paper size in the drawer.</td>
<td>Adjust the side and end guides to match the paper size.</td>
</tr>
<tr>
<td></td>
<td>The amount of paper placed in the Large Capacity Feeder (optional) is too small.</td>
<td>Place more than 10 sheets of paper in the Large Capacity Feeder.</td>
</tr>
</tbody>
</table>
Regular Maintenance

We recommend that you clean the following portions weekly so that the originals can always be scanned in unsoiled conditions.

**Notes**

- Be careful not to scratch the portions when cleaning them.
- When cleaning the surface of the equipment, do not use such organic solvents as thinner or benzine.
  - This could warp the shape of the surface or leave it discolored.
  - When using a chemical cleaning pad to clean it, follow the instructions.

1. Scanning area (surface of the long rectangular glass) / 2. Original glass
   Wipe it with a soft dry cloth. If there are still stains remaining, wipe clean with a piece of soft cloth which has been moistened with water and then squeezed well. Do not use liquids other than water (such as alcohol, organic solvents or neutral detergent).

   Clean the surface as follows depending on the extent of the staining.
   - Clean it with a soft cloth.
   - Clean it with a soft cloth lightly moistened with water.
   - Clean it with a soft cloth lightly moistened with alcohol, and then wipe with a dry cloth.
   - Clean it with a soft cloth lightly moistened with watered-down neutral detergent, wipe with a cloth moistened with water, and then wipe with a dry cloth.
